Your Fresh Fruits and Vegetables
Safe Handling for Good Health

Home Handling Tips for Consumers
Presentation Outline

• What do I need to know about food poisoning?
• How can I reduce my risk?
• How can I help others reduce risk?
What do I need to know about food poisoning?

• It is caused by naturally-occurring pathogens you cannot see, smell or taste.
• It is common. 1 in 6 Americans get sick from food poisoning each year.
• It can be dangerous – about 3% of illnesses lead to more serious long-term health effects.
• There are things you can do to help reduce your risk! Everyone has a role to keep food safe!
Should I be worried?
No, not worried – informed!

• The US food supply is among the safest in the world.

• Some people are at greater risk for getting sick – older people, young children, pregnant women, and people with weakened immune systems.

• Fresh fruits and vegetables are necessary for a healthy diet – and can be a source of foodborne pathogens.

• Brush up on home produce safety tips for good health!

Safe Handling of Fruits & Vegetables

“Food safety is integral to eating well. It doesn’t have to be a scary conversation—it’s simply about forming good basic habits for preparing and enjoying more produce.”

— Ellie Krieger
Registered dietitian and TV personality

CHECK
Clean
Rinse
Separate
Chill
Throw Away
• Check that the fresh fruits and vegetables you buy are not bruised or damaged.
• When choosing pre-cut fruits and vegetables like packaged salads and sliced melons, check that the product is refrigerated or on ice.
• Wash hands with warm water and soap for at least 20 seconds before and after handling fresh fruits and vegetables.

• Clean all surfaces and utensils with hot water and soap, including cutting boards and knives, before and after preparing fresh fruits and vegetables.
Just before use, rinse under running water only the fruits and vegetables you plan to eat, including those with skins or rinds that are not eaten.

Firm-skinned fruits and vegetables should be rubbed by hand or scrubbed with a clean brush while rinsing under running tap water.

Packaged fruits and vegetables labeled “ready-to-eat,” “washed” or “triple washed” should not be washed.

Dry fruits and vegetables with a clean cloth or paper towel.

Do not use soap or bleach to wash fresh fruits or vegetables. These products are not intended for consumption.
• In your refrigerator, keep fresh fruits and vegetables separate from raw meat, poultry, seafood and eggs.

• When preparing food, keep fresh fruits and vegetables separate from raw meat, poultry, seafood, and eggs. Do not use the same cutting board or utensils without cleaning with hot water and soap before and after preparing fresh fruits and vegetables.
• Keep your refrigerator at or below 40° F.
• Refrigerate all cut, peeled or cooked fresh fruits and vegetables within two hours of preparing.
• Throw away any fresh fruit and vegetables that have not been refrigerated within two hours of cutting, peeling or cooking.
• Remove and throw away bruised or damaged portions of fruits and vegetables when preparing to cook them or before eating them raw.
• Throw away any fruit or vegetables that have touched raw meat, poultry, seafood or eggs.
• If in doubt, throw it out!

Building a community of ProducePros

Proper food handling is important to good health!

Help friends and family become ProducePros and reduce risk of food poisoning!

• Advise at-risk people (elderly; pregnant women; immune-compromised) about the 6 smart produce-handling tips.
• Visit fightbac.org and follow @Fight_BAC on Twitter.
• Ask school teachers if they teach the importance of food safety education and highlight fightbac.org as a resource.
• Volunteer to organize a community presentation about basic safe food handling.
