Welcome to Safe Recipes!

The Partnership for Food Safety Education welcomes you to a cookbook like no other!

All the recipes you'll find here were created by kids and teens across the United States. These lunches are not only delicious but also have lots of healthy ingredients!

You'll also notice each recipe has food safety instructions in four areas: handwashing, temperature, cross-contamination, and handling fresh fruits and vegetables.

We call these "safe recipes." A safe recipe is one that tells you to do things like "wash your hands with soap and water." Studies show when these instructions are included, people follow them!

Congratulations to every student who entered the Young Cooks Recipe Challenge! Your hard work is appreciated. In fact, so many great dishes were submitted that the book contains 14 tasty lunches. That's enough for two weeks!

Check out our website fightbac.org/saferecipes for many more delicious, simple, and safe recipes everyone will love. When you try one, tag us on Instagram at [@safe.recipes](https://www.instagram.com/safe.recipes)!

How to Develop a Safe Recipe

Whether you're writing your own recipe or helping someone else, the steps are the same to create a delicious, safe recipe.

- **Look for inspiration.** This can come from anywhere but can be as easy as adding a new twist on a favorite dish, or using up ingredients in the fridge or pantry.
- **Do some research.** Read other recipes to get an idea of ingredients, amounts, methods, times, and temperatures.
- **Decide what makes your recipe different.** Whether it's making a dairy-free creamy potato soup or adding vegetables to traditional shrimp and grits, every cook adds their own special twist.
- **Write it down.** Make a list of the cookware, utensils, and ingredients in the order you'll use them and a basic outline of the steps. Instructions should be clear and begin with action words like chop, stir, whisk, bake, etc.
- **Time to cook!** Test and make changes to the steps as you go. Add cooking signals, like "about X minutes" or "check when it starts to smell like..."
- **Make one change at a time.** Don't make too many changes at once. Edit your recipe one step at a time.
- **Get creative.** A strong finish is important. At the end of the recipe, try a bit of lemon juice, vinegar or fresh herbs to add more flavor.
- **Keep trying!** Cooking takes practice. Don't give up if things didn't turn out the way you wanted the first time.
- **Add food safety prompts.** Be sure to double-check the [Safe Recipe Style Guide](#) to make sure you haven't missed anything.
- **Photo finish!** Take a nice photo of your creation so everyone can see your hard work.

Common Cooking Words

Looking through this book, you might come across some new words. They might be ones you haven't heard before or aren't quite sure what they mean. Lots of them are action words that tell you what to do with ingredients.

Here is a list of common cooking words and what they mean:

Bake/Roast: When you turn on your oven and preheat it to a certain temperature, the air inside the oven gets hot. Cooking food in a hot oven is called baking or roasting. Usually, baking refers to bread or dessert, while roasting is used when talking about meat or vegetables.

Boil: When water is heated to 212 °F (degrees Fahrenheit), it creates lots of bubbles, and the water moves quickly in the pot. A “rolling boil” means lots of fast, big bubbles. A “low boil” means smaller, slower bubbles.

Broil: Similar to baking, but the food is cooked in the oven at very high heat. It's close to the heat source which is usually at the top. Food can burn easily when broiled, so be sure to keep an eye on it in the oven!

Chop: In general, this means to cut food into bite-sized pieces that are all about the same shape and ½-inch in size.

Dice: To cut food into a square shape. A small dice is 1/8-inch, a medium dice is ¼-inch, and a large dice is ½-inch. A commonly diced ingredient is onions.

Drizzle: Pour a liquid, like dressing or melted butter, in a very thin stream.

Mince: To cut something into very tiny pieces. Ingredients often minced are garlic, ginger, and fresh herbs.

Puree: To grind food until completely smooth, usually in a blender or food processor.

Slice: An ingredient like potatoes, onions or tomatoes are cut into large, flat pieces.

Whisk: To beat ingredients together very quickly, usually with a whisk or fork, to blend or add air.

What other cooking words do you know?

Food Safety Tips for Parents

97% of consumers failed to wash their hands properly when preparing a meal.*

*According to a 2018 study, U.S. Department of Agriculture

1 in 6 Americans get a foodborne illness each year.

Children represent half of all hospitalizations for foodborne illness in the United States each year.

CLEAN

Before preparing lunch, wash your hands with warm water and soap for 20 seconds. Wash your cutting boards, utensils and countertops with hot, soapy water. Rinse fresh fruits and vegetables under running water, including those with skins and rinds that are not eaten. Make sure reusable lunch bags and coolers are clean before packing.

SEPARATE

Use one cutting board for fresh produce, and a different one for meat and poultry. Don't place cooked food on a plate that previously held raw meat, poultry, seafood or eggs. This will help you avoid cross-contamination or spreading bacteria from one food product to another.

COOK

Use a food thermometer that measures the internal temperature of cooked meat, poultry and egg dishes, to make sure that the food is cooked to a safe internal temperature (see page 13). Read and follow food package cooking instructions when using the microwave.

CHILL

Use an insulated lunch bag or cooler and at least two cold sources, such as freezer packs, for lunches that contain perishable food items like luncheon meats, eggs, cheese or yogurt. This will help keep food chilled until lunchtime.
